

News from One and Two

Looking Back...

Language Arts – We really enjoyed our author study on Kevin Henkes and his popular books that deal with the topics of friendship and feelings and family. We then spent some time in our readers.

Math – Both grades started the month with a unit on Addition and did excellent work on their number skills. The Grade Ones then moved on to Subtraction while the Grade Twos investigated measurement and patterning.

Body Connections – We spent the first three weeks of October learning the basics about our skeletons and muscles and some introductory information about how our brains communicate with the rest of our body and how our hearts and lungs function.

O Canada – We have gotten off to a great start in our look at Canada. We have learned the parts of a globe, the cardinal directions and the continents of the world.

For Your Information...

Reminders –

Friday, November 20 is a P.A. Day for the school.

Homework Books – The children are doing a great job in remembering to get their books signed and returned to school each day. Please remember to sign the book and fill in the reading log each evening. We are colouring creatures every day to put up on our wall!

Happy Birthday – Congratulations to Eli as he celebrates his 6th birthday on November 8th.

Issue Three – October/November

Looking Ahead...

Language Arts – The beginning of November will see both grades doing group work as we read a variety of Frog and Toad stories by Arnold Lobel. We will be working on sequencing the events in stories and studying the relationship between these two friends. We will then try our hand at letter writing to people around our school. Keep up the great work with your Spelling Words!!

Math – The Grade Ones will continue to practice their Subtraction skills at the start of November before moving on to look at Geometric figures. The Grade Twos will also begin a unit on Subtraction that will take most of the month before beginning a unit on Telling Time.

Social Studies – At the beginning of November we will continue our look at our amazing country of Canada. We will learn the names of all of our provinces and territories and where to find them in Canada as we introduce some basic map skills.. We will also discuss some of the symbols of Canada as well as some popular landmarks.

Science – Sensational – We will examine our Five Senses during a Science unit in the last part of November to discover how our eyes, ears, nose, mouth and touch allow us to experience the world around us.

**We
Will
Remember**
